

## Power Supplies For Instrumentation

The Telmar Model WE-114 is a general-purpose plug-in type instrumentation power supply designed for the technician or engineer in service bench or field applications. Grounded AC input and 24VDC output provide instrument loop power in virtually any plant location. The WE-114 is CSA and UL approved with 250MADC output current capable of powering up to (10) 4-20MADC transmitters or loops.

## TECHNICAL SPECIFICATIONS

### INPUT VOLTAGE:

115 V AC 50/60Hz

### OUTPUT:

24 Volts DC @ 250MADC

### ACCURACY:

+/- 1.5%

### OPERATING TEMPERATURE RANGE:

0 to 40°C

## AC/DC POWER SUPPLY

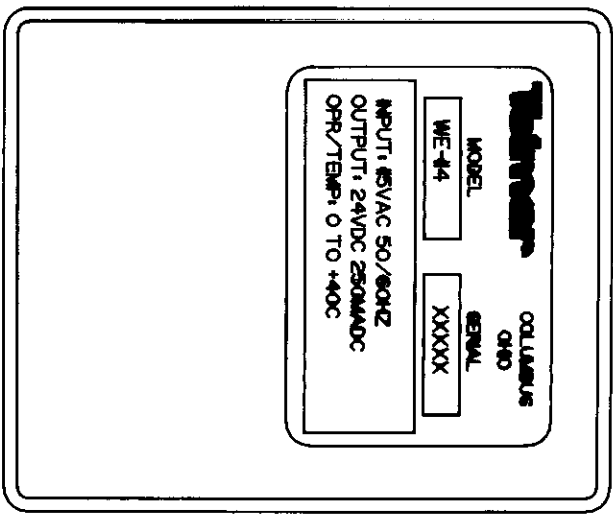

## FEATURES

- Plug-in Design
- High Output Current
- CSA/UL Approvals
- High Impact Plastic Case

WSD-A-5012

A

NOTES:  
1. REFER TO SERIAL NUMBER TAG FOR INPUT/OUTPUT INFORMATION.
